

→ click mail Box

normal flow

→ Open mail/Box  
→ Select all check mark (7)  
→ Open another UI Delete option  
click the Delete Button.  
→ Refresh click  
→ one Cycle Completed,

→ Take input from user,  
stored, and Delete in mail deletion,  
→ Search the Query,  
→ Get Response, List of mails filtered.  
→ Check Select all mail option,  
→ Click Delete Button,  
→ Clear the all list of mails.  
→ Refresh It,  
→ Cycle Completed.

① → From where from Received mail.  
Ex: offer.amazon.com  
offer.flipkart.com  
Here we can Domain base also.

② → To To whom not important at now,

③ Subject If you know Subject you Search By using subject.

④ Including the words:- Some words by using filter  
like mails,

⑤ Doesn't have: "Congratulations" word doesn't  
have into the mail you can delete doesn't  
this type of words.

⑥ & ⑦ Size Greater than & less than  
1mb Less than,  
1mb Greater than.

⑧ Date & Time Give Date & Time to filter  
for mails,

Ex:  
Today Date is  
→ 24/feb/2023

→ 11:26 PM

Below this time every thing you want delete, all the  
mails,

⑨ mail's types,  
Social media,  
Add's  
youtube notifications  
offers  
Shopping

All → is best way to select -

⑩ & ⑪

Attachments & chats

Here you need select  
properly if any imported attachments with does

Get skip files options, chats also,

⑫ Search the Query

Right here Query will return  
Something like list of mails

Just select All Deleted if

that it . . .

Some steps flow from the  
Bin cleaning -

first of all Complete your course

24/feb/2023

11:54 PM

Select option

All the mails

Span cleaning

option

Clean & clear mail box

→ All the mails only cleared

→ Span clean

→ Bin clean
